The cleanest, smoothest,
loudest enclosure you
will ever hear.

AUDIOENHANCERS, INC.

The Leader in the Automotive Speaker Cabinet Industry for 27 Years

FIBERGLASS ENCLOSURES NOW SHIPPING!

Available in sealed and ported enclosures.

Fabulous!

"Your new box is a tremendous! Not only does it offer a total custom look that goes in any vehicle, the box is built right. It is strong enough to withstand a 200 pound man standing on it with no flexing at all. Sound compression is great with absolutely no ringing—which sometimes happens with fiberglass boxes. And the finish is awesome."

— Chris Thomason, Nu Wave

"These boxes are sleek looking, affordable and add a custom touch of class to any vehicle. I loaded an M-Class Memphis subwoofer and it sounded excellent! Also used a Kicker Comp VR and added 50% polyfield—the box sounded great. Sold my boxes already!"

— Jay Carter, CarTunes Custom

Hand layered for strength and light weight

Smooth curves

Raised Fins

1" Urethane foam lined

Impressive style

20 oz fiberglass matt

Finished in a high gloss Nason 2K urethane

3/4" MDF speaker ring
